We have been using Lanopro Wire Grease to lubricate the 50 mm crane rope on the 100t ship crane on our anchor handling supply ship Norman Progress. Norman Progress has been operating in Brazil and the rust protection and lubrication has so far been satisfactory. Surprisingly there have been no dripping from the coated wires in the very warm climate the ship has been operating in.

The Lanopro Universal Grease, Wire Spray, and Storage Oil have also been in use with similar good results.

Knut Arne Eltvik  
Operation Manager
