

Chain Lube H1

- reduces general wear on the chain
- increases the lifespan of the chain
- prevents friction sounds
- outstanding penetrating characteristics
- protects against corrosion
- NSF approved

GENERAL INFORMATION

CHAIN LUBE H1 is an NSF type H1 registered lubricant, formulated from ingredients which are all NSF registered.

CHAIN LUBE H1 has excellent penetrating characteristics which mean that friction sounds and general wear on the chain are reduced.

CHAIN LUBE H1 has strong water-repellent and protective characteristics which resist corrosion and increase the chain's lifespan.

TECHNICAL INFORMATION

NSF registration number : 140737, Category H1
Compliant with : FDA, Title 21, Section 178.3570
Free from : lead, animal fat and synthetic oils
Odour : typical
Operating temperature : -5°C to +100°C

Safety measures : please consult the safety sheet

PACKAGING

Aerosol 400 ml Article number 214501000

Abbreviation CL1

APPLICATIONS

- all foodstuffs firms
- abattoirs
- dairy processing firms
- bakeries
- tinned goods factories
- breweries
- bottling plants
- cardboard factories

All chains of:

- production machines and equipment
- forklifts
- conveyor belts
- refrigerated vehicles
- floor cleaning machines
- drive belts

OPERATING INSTRUCTIONS

- Shake the canister well before use.
- Spray the chain sufficiently.
- To obtain an optimum result, first remove old lubricant with Novatio Safety Clean.

RE: Chain Lube H1
Category Code: H1
NSF Registration No. 140737

Dear Mr. Bert Vissers:

NSF has processed the application for Registration of **Chain Lube H1** to the NSF International Registration Guidelines for Proprietary Substances and Nonfood Compounds (2007), which are available at www.nsfwhitebook.org. The NSF Nonfood Compounds Registration Program is a continuation of the USDA product approval and listing program, which is based on meeting regulatory requirements including FDA 21 CFR for appropriate use, ingredient and labeling review.

This product is acceptable as a lubricant with incidental food contact (H1) for use in and around food processing areas. Such compounds may be used on food processing equipment as a protective anti-rust film, as a release agent on gaskets or seals of tank closures, and as a lubricant for machine parts and equipment in locations in which there is a potential exposure of the lubricated part to food. The amount used should be the minimum required to accomplish the desired technical effect on the equipment. If used as an anti-rust film, the compound must be removed from the equipment surface by washing or wiping, as required to leave the surface effectively free of any substance which could be transferred to food being processed.

NSF Registration of this product is current when the NSF Registration Number, Category Code, and Registration Mark appear on the NSF-approved product label, and the registered product name is included in the current NSF White Book Listing of Nonfood Compounds at the NSF website (www.nsfwhitebook.org). The NSF Registration Mark can be downloaded by clicking the "Download Registration Mark" link on the NSF website (www.nsfwhitebook.org).

NSF Listing of all registered Nonfood compounds by NSF International is not an endorsement of those compounds, or of any performance or efficacy claims made by the manufacturer.

Registration status may be verified at any time via the NSF web site, at www.nsfwhitebook.org. Changes in formulation or label, without the prior written consent of NSF, will void registration, and will supersede the on-line listing.

Sincerely,

A handwritten signature in black ink that reads "Jennifer De France".
