

**FOR A SMOOTH TRANSITION ON PAINTED AREAS**

- Varnish thinner.
- Old and new varnish flow easily together.
- Perfect for using after Novaclear Coat.
- Easy to polish.
- Quick to sand.

**General information**

SPOTREPAIR is perfect for overlapping wet areas after using Novaclear Coat. SPOTREPAIR has excellent thinning properties to let old and new varnish flow freely together.

SPOTREPAIR facilitates polishing. SPOTREPAIR is essential for good results and saves time.

**Technical information and packaging**

Appearance: Aerosol  
 Colour: Clear  
 Odour: Specific  
 Vapour pressure (at 20 °C): 5200 hPa  
 Density (at 20 °C): 0.75 g/cm<sup>3</sup>.

Solubility in water: None  
 Mixability in water: Poor  
 EU VOC: 751,4 g/l  
 Safety measures: Please consult the safety data sheet.

**Applications and use**

- sand the surface to be treated with a No. 2000 grain;
- apply 2 to 3 thin layers on the transit zones of the fresh Novaclear Coat and the existing varnish to obtain a homogenous coat;
- remove residue with Novacare RC1.
